

BioTuring Enhancement of Spatial Technology (BEST) Program

WHAT IS BEST PROGRAM?

BioTuring Enhancement of Spatial Technology (BEST) Program is an initiative by BioTuring to help researchers overcome the computational challenges of single-cell spatial data by offering BioTuring Lens - The GPU-accelerated platform for spatial-omics data analysis.

SUPPORTED TECHNOLOGIES

10X Xenium | NanoString CosMx | Vizgen MERSCOPE

ELIGIBILITY

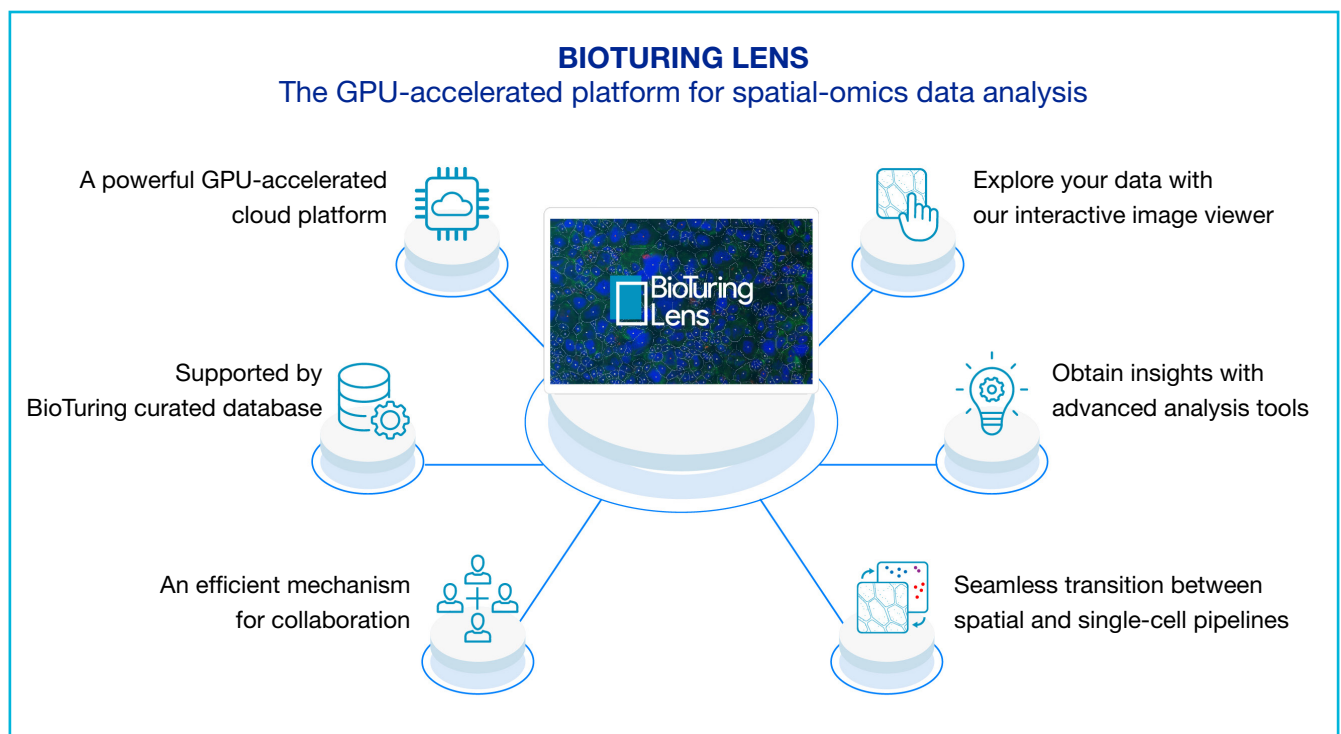

Researchers who have data from the supported technology platforms are eligible to participate in the program.

KEY BENEFITS

- Free access to BioTuring Lens for your first single-cell spatial dataset
- Technical support for digesting your dataset
- Ability to perform computationally intensive analyses on BioTuring's powerful computing system
- Free storage and analytical support to ensure that you produce top-quality results for publication.

APPLICATION DEADLINE

The program is available until **May 31st, 2023**

HOW TO JOIN?

Send us an email to **support@bioturing.com**
We will reach out and help you proceed
